WHAT'S NEW THIS ROUND?

Dunlop continues as the tire partner of choice for 2025, supporting 9 teams in the Formula EWC class and all 18 in the Superstock Trophy class.

A new tire profile with updated technology will debut in Formula EWC, aimed at improving performance and consistency.

With home favourite Team Étoile, defending winner TONE Team 4413 EVA 02 BMW and a strong field of challengers on the grid, the Superstock Trophy class promises to have some of the closest action at Suzuka.

LAST YEAR'S RESULTS

Dunlop tires delivered great performance in the 2024 edition, offering quick warm-up in the opening laps and maintaining impressive pace and durability throughout the race.

Nestled in the Mie Prefecture of Japan, Suzuka Circuit is renowned for its unique figure-of-eight layout and demanding corners that test the skills of every rider. In preparation for the 2025 round, the circuit has been fully resurfaced, with significant attention given to the East Course, which features the Sector 1 Esses.

Furthermore, the addition of double kerbs at the Degner Curves (turn 8-9) will improve rider safety. They give way to a series of technical and tight corners in sector two. Riders then navigate their way to the long back straight and the infamous, fast sweeping 130R left-hander at turn 15. The lap concludes with the tight chicane of turns 16 and 17.

Tire degradation is a critical factor for riders throughout stints, as the varying corner types and high average speeds place significant stress on the tires.
