WHAT'S NEW THIS ROUND?

Dunlop continues as an Official Partner of the FIM Endurance World Championship, kicking off the 2026 season supplying tires to more than two-thirds of the teams on the grid at the 24 Heures Motos.

Dunlop is the exclusive tire supplier to the Superstock (since 2022) and Production (since 2025) classes, and is the choice of seven teams in Formula EWC.

Teams in all three classes will have a combination of new and proven tires from Dunlop's KR racing slick ranges. Data gathered in EWC goes into developing the next generation of Dunlop racing and track day tires.

LAST YEAR'S RESULTS

12 months ago marked the inaugural race of the Production class and one of the most competitive Superstock fields in the championship's history.

SUPERSTOCK WINNERS

#55

National Motos Honda

The French team won at Le Mans last year en route to being crowned 2025 Superstock champions

PRODUCTION WINNERS

#222

Team Supermoto Racing Yamaha

The first ever EWC Production class race winners, ultimately finished runner-up in the championship

ENERGY LEVEL

LOW/MEDIUM
GRAINING RISK

The Le Mans Bugatti circuit is a highly prestigious and historic venue situated in the Pays de la Loire region of France. The track stretches over 4.2 km through 14 turns that test the skills of even the most experienced riders.

Surrounded by picturesque French countryside, the Bugatti circuit offers a challenging experience for the riders. The venue boasts numerous grandstands and vantage points that provide stunning views of the action for fans.

The circuit has low grip levels compared to other tracks on the calendar, which are exaggerated in the wet. Right-hand turn 6 and left-hand turn 7 typically create the highest energy levels in the rear tire, but over the whole lap excessive heat generation isn't normally a problem.

Managing tire performance through varied conditions, day and night, is key to winning a 24-hour race like Le Mans.
